

COOPERATION THROUGH CONVERSATION

Talk Me Home.

You have the map.

Pip has eyes and hands.

Neither can escape alone.

One world, two incomplete views.

YOU / MISSION CONTROL

Private maps and equipment manuals
Remote Power, Relay and Charge
A plan — and the final confirmation

PIP / INSIDE THE STATION

Local eyes and hands
Observed clues and passage checks
A specific physical proposal

The shared conversation is the bridge. Neither side gets an automatic complete view.

Listen. Decide. Confirm.

The screenshot displays the 'Talk Me Home' interface for a 'Rescue Mission'. The top navigation bar includes 'Talk Me Home', 'Rescue Mission', 'Settings', 'About & privacy', 'Live Voice', 'End Call', and 'Restart'. The main header shows 'Relay Gallery' with the instruction 'Match your map with Pip's local clues to find the Dock.' Below this, the 'MISSION CONTROL / 02 Remote Relay' section has buttons for 'Off', 'Beacon', and 'Harbor', with a note: 'One circuit at a time. Tell Pip your selection, then recheck gate conditions. A powered gate can still be blocked.' The 'Mission Control documents' section shows the 'Relay Gallery atlas' with a legend for 'B · Beacon circuit' and 'H · Harbor circuit', and a 'Plan route' button. The main map area, titled 'RELAY GALLERY CIRCUIT & WAYFINDING ATLAS', shows a network of nodes: Ring (Entry), Beacon, Fork, Harbor, Sail, Beacon, Leaf, and Dock (To Return Dock). The map includes a compass rose and a legend for 'ALL GATES · TWO-WAY'. The right sidebar shows 'Your partner Pip UNIT 04' with a 'Live Voice' button and a 'History (39)' button. Below this, 'PIP'S PROPOSED ACTION' is 'Move through the southwest gate', with a 'Confirm this action' button and a 'Not yet' button. The 'Conversation history' section shows a scrollable list of reports, with a 'Close history' button. The bottom status bar reads 'AUTOMATED QA — SYNTHETIC VOICE + UI CONFIRMATION — REAL ASSEMBLYAI'.

1 LISTEN

“there is cargo blocking the opening.”

2 REVISE

Check the southwest passage. Backtrack.

3 CONFIRM

Commit the exact move.

Three chapters, one rescue.

- 01 **Cargo Bay**
Discover the shared supply.
- 02 **Relay Gallery**
A reported obstruction changes your route.
- 03 **Return Dock**
Hold, charge, store — then return together.

PRACTICE · NEW GAMEPLAY BUILD

Optional: bring back Pip's flight recorder.

Go home directly, or visit the archive. Only a confirmed pickup changes the shelf.

Voice makes the partner possible.

HUMAN CONSOLE / EXACT CONFIRMATION

Only an admitted confirmation commits a physical proposal.

Conversation exchanges information. Authority remains in the game server.

A working prototype, with a clear next step.

HISTORICAL REAL VOICE

One full rescue, synthetic input.
Ending ACK received.

NEW BUILD / PRACTICE

Optional recorder demonstrated.
No new Live acceptance.

NEXT / STILL UNMEASURED

Human enjoyment, physical audio, reliability.
Hosting and submission remain separate.
